**IN RE: ETHICON, INC. PELVIC REPAIR
SYSTEM PRODUCTS LIABILITY
LITIGATION**

**THIS DOCUMENT RELATES TO
ETHICON WAVE 7 CASES**

**Master File No. 2:12-MD-02327
MDL No. 2327**

**JOSEPH R. GOODWIN
U.S. DISTRICT JUDGE**

**MEMORANDUM IN SUPPORT OF MOTION TO EXCLUDE
CERTAIN GENERAL OPINIONS OF BRUCE ROSENZWEIG, M.D.**

Defendants Ethicon, Inc. and Johnson & Johnson (hereinafter “Ethicon”) submit this memorandum in support of their motion to exclude certain opinions of Bruce Rosenzweig, M.D., with respect to the cases set forth in Exhibit A.

Ethicon’s brief in this wave of cases is very similar to its brief submitted for the Wave 3 cases (Dkt. No. 2818), and Ethicon has incorporated herein by reference several aspects of that brief. As set forth herein, Ethicon presents certain arguments that have not previously been presented, that were reserved or not previously addressed by the Court, and/or that have been supplemented with additional authorities, including as follows: (a) in Section I, Ethicon requests that the Court preclude Plaintiffs from incorporating by reference multiple expert reports of Dr. Rosenzweig relating to the same device; (b) in Section II, Ethicon requests that the Court preclude Dr. Rosenzweig from suggesting that traditional surgical procedures are safer alternatives to Ethicon’s medical devices consistent with recent rulings by this Court and others; and (c) in Section VII, this brief highlights a *Daubert* ruling by the United States District for the Northern District of Illinois as it relates to a Wave 1 case remanded from this Court (*see Walker v. Ethicon, Inc.*, 2017 WL 2992301 (N.D. Ill. June 22, 2017)).

INTRODUCTION

Dr. Rosenzweig is a pelvic surgeon and urogynecologist with experience in the surgical treatment of stress urinary incontinence (“SUI”), as well as the removal of sling systems. Ex. B, curriculum vitae. In three remaining cases in this wave, he intends to provide general opinions about TVT and TVT-O (collectively “the TVT Devices”), which are used for the surgical treatment of SUI. Ex. C & D, Expert Reports.¹ As set forth below, the Court should preclude Dr. Rosenzweig from testifying about matters that are beyond his expertise, that are irrelevant, that are unreliable, that are prejudicial, and/or that would confuse or mislead the jury.

LEGAL ARGUMENT

Ethicon incorporates by reference the standard of review for *Daubert* motions set forth by the Court in *Huskey v. Ethicon, Inc.*, 29 F. Supp. 3d 691, 701 (S.D.W. Va. 2014).

I. Plaintiffs’ broad and vague attempts to rely on unspecified prior reports of Dr. Rosenzweig is improper.

Under PTO No. 269, Plaintiffs had a December 13, 2017 deadline to submit their expert disclosures. The Plaintiffs set forth in Exhibit A have disclosed their intent to rely on Dr. Rosenzweig, who incorporated a Wave 5 general report for six different devices. However, Dr. Rosenzweig’s Wave 5 TVT and TVT-O reports broadly state that “I incorporate my past reports and testimony” about each device. Ex. C, TVT Report at 99; Ex. D, TVT-O Report at 116. Further, two of Plaintiffs’ expert designations broadly and vaguely purport to reference all of Dr. Rosenzweig’s past “reports” without specifying which report. *See*, Ex. E, Mueller Expert Desig. at 3; Ex. F, Sutphin Expert Desig. at 1.

To make matters worse, Plaintiffs have filed a “Notice of Adoption of Prior Expert Reports and Testimony of Dr. Bruce Rosenzweig,” purporting to adopt six different previous

¹ As set forth in Section I below, Plaintiffs have purported to rely on multiple reports from Dr. Rosenzweig. In the interest of brevity, however, Ethicon has only filed Dr. Rosenzweig’s most recent reports specific to Wave 5.

reports submitted by Dr. Rosenzweig with respect to the TVT and TVT-O devices “to be used at the discretion of the individual plaintiffs in the cases designated in Wave 5, and any future waves of Ethicon cases designated by the Court.” Doc. 3947. Ethicon has filed a motion to strike that notice, to which Plaintiffs never responded, and that motion is pending. *See* Doc. 4045.

Dr. Rosenzweig does not identify or limit the “past reports” that he intends to incorporate by reference. Ex. C, TVT Report at 99; Ex. D, TVT-O Report at 116. At this point in this litigation, many experts, including Dr. Rosenzweig, have submitted a multitude of reports—both general and case-specific. Vague and expansive references to any and all other reports that may have been submitted throughout the course of this litigation could lead to uncertainty and confusion about what opinions a particular expert intends to provide at trial. Thus, Ethicon requests that Dr. Rosenzweig rely on only one report per device for this wave of cases and other waves of cases.

II. The Court should preclude Dr. Rosenzweig from testifying that non-synthetic mesh procedures are a safer alternative.

Dr. Rosenzweig believes that “traditional surgeries like the Burch and pubovaginal slings” lead to fewer complications than TVT Devices for the surgical treatment of SUI. *See* Ex. C, TVT Report at 93; Ex. D, TVT-O Report at 108-109. Any alleged comparative benefits of the traditional approaches to treat SUI recommended by Dr. Rosenzweig are not even relevant to Plaintiffs’ design defect claims, because these approaches are not even a medical device and do not entail altering the design of the devices. Ethicon challenged these opinions in its Wave 1 briefing, and the Court determined that “[t]he relevance of this expert testimony is better decided on a case-by-case basis,” and therefore, reserved ruling. *In re Ethicon, Inc. Pelvic Repair Sys. Prod. Liab. Litig.*, 2016 WL 4500765, at *3 (S.D.W. Va. Aug. 26, 2016). Since that time, however, the Court has issued several rulings suggesting that this should be revisited.

First, the Court has determined that opinions about alternative procedures are not a case-specific issue, but instead, an issue within “the province of a general causation expert—not a specific causation expert.” *Brooks v. Ethicon, Inc.*, No. 2:12-cv-02865, Mem. Op. at 4 (S.D.W. Va. July 12, 2017), Ex. G hereto.

Second, this Court recently precluded one of Plaintiffs’ other general causation experts, Dr. Nathan Goodyear, from offering very similar opinions. In *In re: Ethicon, Inc. Pelvic Repair Sys. Prod. Liab. Litig.*, 2017 WL 1264620, at *3 (S.D.W. Va. Mar. 29, 2017), the Court stated:

Ethicon argues that Dr. Goodyear’s opinions regarding *alternative procedures* are irrelevant to the question of whether a safer alternative design of a product exists. Ethicon states, “[A] medical device *product* is not defective in design simply because alternative surgical and nonsurgical *procedures* may exist.” Defs.’ Mem. Supp. Mot. 4. *I agree with Ethicon that alternative procedures/ surgeries do not inform the issue of whether an alternative design for a product exists.* Accordingly, Ethicon’s Motion on this point is **GRANTED** and Dr. Goodyear’s alternative procedures testimony is **EXCLUDED**.

(Emphasis added).

Third, in interpreting West Virginia law in *Mullins v. Johnson & Johnson*, 2017 WL 711766, at *2 (S.D.W. Va. Feb. 23, 2017), the Court explicitly found that “[e]vidence that a surgical procedure should have been used in place of a device is not an alternative, feasible design in relation to the TVT.” The Court reasoned that “other surgeries or procedures do not inform the jury on *how* the TVT’s design could have feasibly been made safer to eliminate the risks that caused the plaintiffs’ injuries.” *Id.* (emphasis in original). The Court further found that “the plaintiffs must provide evidence of an alternative, feasible design for the *product* at issue,” which entails “provid[ing] sufficient evidence to identify a comparable product or design concept, whether the *design features* of the comparable product or the *design concept* existing at the time of the [device’s] manufacture” *Id.* at *3 (emphasis in original). *See also Schmidt*

v. C.R. Bard, Inc., 2013 WL 3802804, at *2 (D. Nev. July 22, 2013) (“[N]on-mesh repair is not an alternative design and does not meet Plaintiff’s burden to support” a design-defect claim).²

As in *Mullins*, West Virginia law will apply to the cases set forth in Exhibit A hereto, with the exception of Plaintiff Tabitha Mueller. Nevertheless, Ms. Mueller’s case is governed by Ohio law, which like West Virginia, requires proof of a safer alternative design. Ohio Rev. Code § 2307.75(F).

The notion that traditional surgical procedures are safer alternatives to Ethicon’s devices “really takes issue with the choice of treatment made by [the patient]’s physician, not with a specific fault of” the medical device. *Theriot v. Danek Med., Inc.*, 168 F.3d 253, 255 (5th. Cir. 1999). Dr. Rosenzweig’s opinions about these traditional surgical procedures are not changes to the design feature or the design concept of the device at issue; instead, his opinions would eliminate the device in its entirety. *See also Nease v. Ford Motor Co.*, 848 F.3d 219, 234 (4th Cir. 2017) (finding that controlling case law may “only be read to require the production of evidence on reasonable alternative design, to gauge what ‘should have been’”) (quoting Restatement (Third) of Torts: Products Liability § 2, Reporter’s Note (1998)). This position really takes issue with Plaintiffs’ implanting physicians’ choice to recommend a medical device (ie. TVT) rather than another form of non-device surgery (ie. Burch). But that choice depends on a number of factors beyond Ethicon’s control, including the experience and training of the physician, which is why the law trusts the physician with that decision and does not make the decision for him by allowing a jury to substitute its judgment.

² These rulings are in accord with others. *See, e.g., Linsley v. C.R. Bard, Inc.*, 2000 WL 343358, *3 (E.D. La. Mar. 30, 2000) (holding that while there existed “alternative techniques” for the mesh surgery, such techniques did not prove an “alternative design” for the polypropylene surgical mesh product). They reflect a general principle of product liability law that applies whenever a safer alternative design is claimed.

Therefore, the Court should preclude Dr. Rosenzweig from suggesting that Dr. Rosenzweig's preferred alternatives are safer alternatives to the TVT Devices in this wave of cases.³

III. The Court should preclude Dr. Rosenzweig from testifying that devices with a different type of mesh are safer alternatives for the surgical treatment of SUI.

Ethicon adopts its Wave 3 argument on this issue set forth in Section I of Doc. 2818.

IV. The Court should preclude Dr. Rosenzweig from criticizing the cut of TVT mesh.

Ethicon adopts its Wave 3 argument on this issue set forth in Section II of Doc. 2818.

V. The Court should limit Dr. Rosenzweig's product warning opinions.

Ethicon adopts its Wave 3 argument on this issue set forth in Section III of Doc. 2818.

VI. The Court should preclude Dr. Rosenzweig from testifying about alleged mesh degradation and other biomaterials opinions.

Ethicon adopts its Wave 3 argument on this issue set forth in Section IV of Doc. 2818.

VII. The Court should preclude Dr. Rosenzweig from testifying about duties allegedly owed by a manufacturer.

Dr. Rosenzweig asserts a number of opinions about duties allegedly owed by Ethicon as a medical device manufacturer that are well outside of Dr. Rosenzweig's expertise. Dr. Rosenzweig is not qualified to provide such testimony, and his opinions are unreliable.

A. Testing

Dr. Rosenzweig suggests that Ethicon did not perform adequate testing and studies. *See, e.g.*, Ex. C, TVT Report at 12-13, 19, 63-65; Ex. D, TVT-O Report at 11-20, 106-108. In fact, the TVT is one of the most-tested medical devices ever made. In precluding Dr. Rosenzweig

³ In fact, Dr. Rosenzweig's opinions would be irrelevant and inadmissible if he compared the devices with another medical device that has its own unique advantages and disadvantages to be weighed by the surgeon. *See, e.g., Talley v. Danek Med., Inc.*, 179 F.3d 154, 162 (4th Cir. 1999) (rejecting plaintiff's theory that defendant's spinal-fixation screws were defective because there were alternative spinal-fusion procedures using a different device, ie. wires and hooks).

from offering similar testimony, this Court found that “[t]here is no indication that Dr. Rosenzweig has any experience or knowledge on the appropriate testing a medical device manufacturer should undertake.” *In re: Ethicon*, 2016 WL 4500765, at *5; *Huskey*, 29 F. Supp. 3d at 705. Dr. Rosenzweig has gained no additional expertise, and accordingly, the same reasoning continues to apply.

B. Adverse Event Reporting

For similar reasons, this Court also should exclude Dr. Rosenzweig’s opinion that “Ethicon’s collection and reporting of adverse events and complications to physicians and patients was incomplete, inaccurate and misleading.” Ex. D, TTV-O Report at 100-101. Dr. Rosenzweig’s experience as a surgeon does not qualify him to render opinions on adverse event reporting. He has no relevant experience with the FDA or in the medical device industry that would permit him to offer expert testimony regarding the standard of care for collecting and reporting adverse events. *See, e.g., In re Diet Drugs*, MDL No. 1203, 2001 WL 454586, *16 (E.D. Pa. Feb. 1, 2001) (excluding heart surgeon’s opinions regarding adverse event reporting because surgeon had “no experience or expertise in . . . adverse event reporting” and based his opinions on personal belief rather than reliable methodology).

Not surprisingly, because Dr. Rosenzweig has no relevant experience, he is unable to identify a single rule or regulation that would require Ethicon to collect and report adverse events in the manner he suggests it should have. In fact, Dr. Rosenzweig does not identify *any* basis or reason for his opinion, as he must. Instead, his opinion is apparently based purely on personal belief. The Court should exclude his opinion on that basis. *See Hines v. Wyeth*, 2011 WL 2680842, *5 (S.D. W. Va. July 8, 2011) (finding that expert provided no basis for opinions, rendering them inadmissible “personal opinion”).

Dr. Rosenzweig's critique of Ethicon's adverse event reporting amounts to nothing more than a narrative summary of the evidence. Dr. Rosenzweig cites or quotes Ethicon e-mails and company witness depositions purporting to show that Ethicon employees did not know how many complaints were missed by the company's "complaint tracking system." Because the jury does not need an expert witness to read documents and summarize evidence, the Court should exclude Dr. Rosenzweig's opinions regarding adverse event reporting. *See, e.g., Hines*, 2011 WL 2680842, at *7 (excluding as "irrelevant" and "unhelpful" expert opinion "based on [the expert's] own reading of defendants' internal documents" that the "jury is more than capable of reading and summarizing"); *In re: Ethicon*, 2016 WL 4500765, at *7 ("caution[ing] the parties against introducing corporate evidence through expert witnesses").

In its Wave 1 ruling, this Court found that "opinions about Ethicon's compliance with or violation of the FDA's labeling and adverse event reporting regulations are **EXCLUDED**." *In re: Ethicon, Inc.*, 2016 WL 4500765, at *6. The Court should do so again here and clarify that all of Dr. Rosenzweig's adverse event reporting opinions are excluded, regardless of whether they are specific to compliance with FDA regulations.

In *Walker v. Ethicon, Inc.*, 2017 WL 2992301 (N.D. Ill. June 22, 2017), the Illinois federal district court prevented Dr. Shull from providing similar criticisms of Ethicon's response to adverse event reports. *Id.* at *6. According to the court, "[s]imilar to the MDL Court excluding Dr. Shull's opinion regarding product testing or clinical trials in another case based on a lack of experience with such matters, *see Carlson*, 2015 WL 1931311, at *15, the Court excludes Dr. Shull's opinion regarding the standard of care for adverse event reporting because Plaintiffs have not demonstrated that Dr. Shull has relevant experience to testify as an expert about this matter." *Id.* The court further "note[d] that Dr. Shull cannot serve as a conduit for corporate information by testifying about the extent of Defendants' adverse event reporting." *Id.*

C. Training

Dr. Rosenzweig claims that Ethicon did not appropriately fund and train physicians regarding the use of TVT-O. Ex. D, TVT-O Report at 77-79. Dr. Rosenzweig is not qualified to testify about what funding and level of training that a medical device manufacturer should provide. Further, his opinions are based on a narrative summary of documents rather than any special expertise. In addition, Dr. Rosenzweig's opinions are irrelevant and prejudicial insofar as he does not claim that a specific Plaintiff's implanting physician was not appropriately trained or competent. *See Cisson*, 948 F. Supp. 2d at 614 (excluding similar opinions about training under similar circumstances). Consistent with the Illinois federal court's ruling in *Walker, supra*, the Court should determine that any of Dr. Rosenzweig's opinions about training should be limited to a discussion of "the risks of implanting mesh and whether Defendants' product materials raise those risks, but he may not offer testimony about 'what information should or should not be included in an [Instructions for Use]' or other similar materials." *Walker*, 2017 WL 2992301, at *6.

VIII. The Court should exclude Dr. Rosenzweig's marketing opinions.

Ethicon adopts its Wave 3 argument on this issue set forth in Section VII of Doc. 2818. Ethicon further notes, that in his expert reports, Dr. Rosenzweig speculates about Ethicon's "economic interest" as it relates to the marketing of the device. *See, e.g.*, Ex. C, TVT Report at 3, 50, 54; Ex. D, TVT-O Report at 51-52, 78-79 This Court has determined that "state-of-mind" opinions should be excluded, *In re: Ethicon*, 2016 WL 4500765, at *7, and that pelvic surgeons should not provide marketing opinions. *Huskey*, 29 F. Supp. 3d at 723. *See also In re: Prempro Prods. Liab. Litig.*, 554 F. Supp. 2d 871, 881 (E.D. Ark. 2008), *rev'd in part on unrelated grounds*, 586 F.3d 547, 571 (8th Cir. 2009) (precluding an expert from providing an "editorial about pharmaceutical companies putting sales and marketing before science"). Thus, this Court should also preclude Dr. Rosenzweig from offering such opinions in this wave of cases.

IX. The Court should preclude Dr. Rosenzweig from testifying about MSDS sheets.

Ethicon adopts its Wave 3 argument on this issue set forth in Section VIII of Doc. 2818.

X. The Court should not allow other opinions that are beyond Dr. Rosenzweig's expertise and/or otherwise improper.

Ethicon adopts its Wave 3 argument on this issue set forth in Section IX of Doc. 2818.

Ethicon would further note that, in its prior wave rulings, the Court did not address Ethicon's arguments that Dr. Rosenzweig should be precluded from testifying about cancer and other complications allegedly associated with the TVT Devices that a particular Plaintiff did not sustain. As this Court has recognized, “[e]vidence of complications that the plaintiff did not experience is irrelevant and lacking in probative value.” *Bellew v. Ethicon, Inc.*, 2014 WL 12685965, at *10 (S.D.W. Va. Nov. 20, 2014).

CONCLUSION

For the reasons set forth and referenced herein, Defendants respectfully request that the Court grant their Motion to Exclude the Testimony of Bruce Rosenzweig, M.D.

Respectfully Submitted,
